(54) Title: APPARATUS AND METHOD FOR SELECTIVELY REMOVING A BODY FAT MASS in HUMAN BODY

(57) Abstract: The present invention relates to a method and apparatus for removing body fat. While an obesity patient or person wants to remove body fat built up in a certain part is conducting aerobic exercise such as running with attaching a surface-attaching type catheter on the fat part, the apparatus resolves and removes body fat by applying pulses, whose frequency is  $10 \sim 120$ Hz, through the catheter, and changes the exercising condition based upon his or her heart rate and standard heart rate, thereby conducting efficient removal of body fat.
